

MANUAL - INSTALLATION

SET FOR HALF-MASTING

COMPONENTS

- 2x 3/16" stainless steel eyebolt;
- 1x aluminum counterweight;
- 1x UHMW retaining ring.

ASSEMBLY

1. Place the flagpole on the ground;
2. Make sure the counterweight rod is free to move;
3. Make sure the eyebolt is facing upwards;
4. Install the carabiners on the flag and the counterweight.

FLAG VS FLAGPOLE SIZE

- Designed for one flag – on any type of 2"D to 4"D flagpole (regardless of flag height).

OTHER OPTIONS

- Country/Custom flags.

NOTE

Note that this type of installation is a compromise to the official half-masting – i.e. lowering the flag halfway down its flagpole.
