

MANUAL – INSTALLATION

SET FOR HALF-MASTING

COMPONENTS

- 2x 3/16" stainless steel carabiner;
- 1x aluminium & UHMW counterweight.

ASSEMBLY

1. Place the flagpole on the ground;
2. Ensure the counterweight rod free to move;
3. Ensure the eyelet is facing upwards;
4. Install the carabiners on the flag and the counterweight.

FLAG VS FLAGPOLE SIZE

- Designed for one flag – on any type of flagpole (regardless of flag height).

OTHER OPTIONS

- Painting of the support and flagpole;
- Country/Custom flags.

NOTE

Note that this type of installation is a compromise to the official half-flagpole – lowering the flag halfway down its flagpole.
