

MANUAL – MAINTENANCE FLAGPOLE

TYPE OF FLAGPOLE MC / MA

1. Check if the locking system (internal system and external lock) is working properly;
2. Inspect the quality of the halyard system (internal rope);
3. Check the bolts located at the base of the flagpole as well as those on the counterweight, near the flag;
4. Check the counterweight halyard;
5. Check if there are no cracks on the flagpole, the base of the flagpole and the concrete base.

REPAIR

Tecnima VL's experienced team repairs all types of flagpoles, even those from competitors. We have in stock the necessary parts and equipment to meet your needs, even in case of difficult access situations. A list of information is required beforehand. Please ask us for the flagpole repair questionnaire.

NOTE: It is recommended that you inspect your flagpoles at least twice a year, ideally in the spring and fall when weather conditions are favorable (without snow).

FLAG INVENTORY – COUNTRY & CUSTOM

You can order flags for different countries or provinces. We have several flags in inventory in different formats, always of the highest quality. We also offer this service for your personalized flags.
