

DISTANCE / INFORMATION

FLAGPOLE

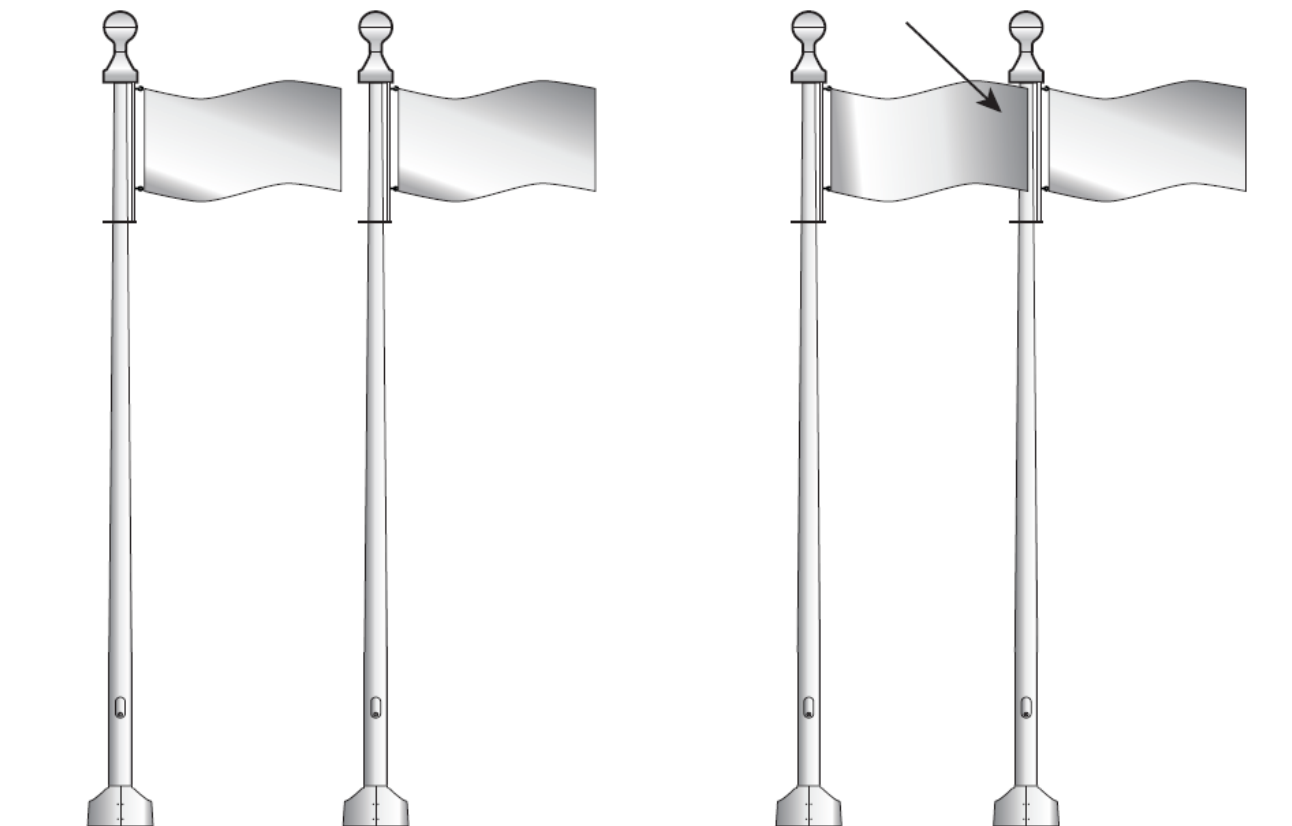

FLAG DISTANCE VS FLAGPOLE

Flag of 54"L	=	Min. distance of 66"
Flag of 72"L	=	Min. distance of 84"
Flag of 108"L	=	Min. distance of 120"

It is necessary to maintain an adequate distance between flagpoles to prevent any contact between the flags and adjacent flagpoles.

***Allow 7 to 10 feet of distance between each flagpole (or any other obstacle).**

Insufficient distance between flagpoles, given the dimensions of the flags, can lead to premature wear of the flags and an increased risk of damage to the flagpole hardware.

NOTE: Calculate the width between the flagpoles. If using a 72"L flag + the diameter of the flagpole + the flag attachments = a distance of 84"

72" L (flag) + 4"D (flagpole) + 3"L (attachments) + 5"L (free space) = 84" distance between each flagpole
